Multiscale Modelling and Simulation Sabine Attinger 2004-07-12 In August 2003, ETHZ Computational Laboratory (CoLab), together with the Swiss Center for Scientific Computing in Manno and the Università della Svizzera Italiana (USI), organized the Summer School in "Multiscale Modelling and Simulation" in Lugano, Switzerland. This summer school brought together experts in different disciplines to exchange ideas on how to link methodologies on different scales. Relevant examples of practical interest include: structural analysis of materials, flow through porous media, turbulent transport in high Reynolds number flows, large-scale molecular dynamic simulations, ab-initio physics and chemistry, and a multitude of others. Though multiple scale models are not new, the topic has recently taken on a new sense of urgency. A number of hybrid approaches are now created in which ideas coming from distinct disciplines or modelling approaches are unified to produce new and computationally efficient techniques.

Strong Men Armed Robert Leckie 2010-02-09 This powerful memoir written by a decorated World War II veteran retells the tumultuous stories of personal struggles and the impact of a chaotic world, told "with that truth recognizable to every combat man " (NYT Book Review). Written by Robert Leckie, whose wartime exploits are featured in the Tom Hanks/Steven

Spielberg HBO miniseries *The Pacific*, *Strong Men Armed* is the perennial bestselling classic account of the U.S. Marines' relentless drive through the Pacific during World War II. As scout and machine-gunner for the First Marine Division, Leckie fought in all its engagements until his wounding at Peleliu. In *Strong Men Armed*, Leckie uses firsthand experience and impeccable research to re-create the nightmarish battles of the Pacific campaign—from Guadalcanal to Okinawa—as ships, men, and guns moved over vast distances to fight an enemy willing to defend to its last man. Here is the whole sweeping epic of the Marines who battled—and won—on the bloody beaches at Guadalcanal, the unforgiving reefs at Tarawa, the rain-soaked mud of New Britain, the dark gray soil and deadly caves of Mount Suribachi, and the muddy slopes of Shuri Castle on Okinawa. It is a masterful narrative by a writer the *New York Times* praised as possessing the "rare gift of capturing all that is human in the most inhuman of man's activities." "Raw, heartbreaking, and superb."--*Christian Science Monitor*

Cornell Glenn C. Altschuler 2014-08-12 In their history of Cornell since 1940, Glenn C. Altschuler and Isaac Kramnick examine the institution in the context of the emergence of the modern research university. The book examines Cornell during the Cold War, the civil rights movement, Vietnam, antiapartheid protests, the ups and downs of varsity athletics, the women's movement, the opening of relations with China, and the creation of Cornell NYC Tech. It relates profound, fascinating, and little-known incidents involving the faculty, administration, and student life, connecting them to the "Cornell idea" of freedom and responsibility. The authors had access to all existing papers of the presidents of Cornell, which deeply informs their respectful but unvarnished portrait of the university. Institutions, like individuals, develop narratives about themselves. Cornell constructed its sense of self, of how it was special and different, on the eve of World War II, when America defended democracy from fascist dictatorship. Cornell's fifth president, Edmund Ezra Day, and Carl Becker, its preeminent historian, discerned what they called a Cornell "soul," a Cornell "character," a Cornell "personality," a Cornell "tradition"—and they called it "freedom." "The Cornell idea" was tested and contested in Cornell's second seventy-five years. Cornellians used the ideals of freedom and responsibility as weapons for change—and justifications for retaining the status quo; to protect academic freedom—and to rein in radical professors; to end in loco parentis and parietal rules, to preempt panty raids, pornography, and pot parties, and to reintroduce regulations to protect and promote the physical and emotional well-being of students; to add nanofabrication, entrepreneurship, and genomics to the curriculum—and to require language courses, freshmen writing, and physical education. In the name of freedom (and responsibility), black students occupied Willard Straight Hall, the anti-Vietnam War SDS took over the Engineering Library, proponents of divestment from South Africa built campus shantytowns, and Latinos seized Day Hall. In the name of responsibility (and freedom), the university reclaimed them. The history of Cornell since World War II, Altschuler and Kramnick believe, is in large part a set of variations on the narrative of freedom and its partner, responsibility, the obligation to others and to one's self to do what is right and useful, with a principled commitment to the Cornell community—and to the world outside the Eddy Street gate.
