[BIM Handbook](#) Chuck Eastman 2011-03-25 "The BIM Handbook is an extensively researched and meticulously written book, showing evidence of years of work rather than something that has been quickly put together in the course of a few months. It brings together most of the current information about BIM, its history, as well as its potential future in one convenient place, and can serve as a handy reference book on BIM for anyone who is involved in the design, construction, and operation of buildings and needs to know about the technologies that support it. The need for such a book is indisputable, and it is terrific that Chuck Eastman and his team were able to step up to the plate and make it happen. Thanks to their efforts, anyone in the AEC industry looking for a deeper understanding of BIM now knows exactly where to look for it."

[Entertainment-Education Behind the Scenes](#) Lauren B. Frank 2021 This Open Access book tracks the latest trends in the theory, research, and practice of entertainment-education, the field of communication that incorporates social change messaging into entertaining media. Sometimes called edutainment, social impact television, narrative persuasion, or cultural strategy, this approach to social and behavior change communication offers new opportunities including transmedia and digital formats. However, making media can be a chaotic process. The realities of working in the field and the rigid structures of scholarly evaluation often act as barriers to honest accounts of entertainment-education practice. In this collection of essays, experienced practitioners offer unique insight into how entertainment-education works and present a balanced view of its potential pitfalls. This book gives readers an opportunity to learn from the successes and mistakes of the experts, taking a behind-the-scenes look at the business of making entertainment-education media.

The Monk in the Garden Robin Marantz Henig 2017-03-21 Most people know that Gregor Mendel, the Moravian monk who patiently grew his peas in a monastery garden, shaped our understanding of inheritance. But people might not know that Mendel's work was ignored in his own lifetime, even though it contained answers to the most pressing questions raised by Charles Darwin's revolutionary book, ON ORIGIN OF THE SPECIES, published only a few years earlier. Mendel's single chance of recognition failed utterly, and he died a lonely and disappointed man. Thirty-five years later, his work was rescued from obscurity in a single season, the spring of 1900, when three scientists from three different countries nearly simultaneously dusted off Mendel's groundbreaking paper and finally recognized its profound significance. The perplexing silence that greeted Mendel's discovery and his ultimate canonization as the father of genetics make up a tale of intrigue, jealousy, and a healthy dose of bad timing. Telling the story as it has never been told before, Robin Henig crafts a suspenseful, elegant, and richly detailed narrative that fully evokes Mendel's life and work and the fate of his ideas as they made their perilous way toward the light of day. THE MONK IN THE GARDEN is a literary tour de force about a little-known chapter in the history of science, and it brings us back to the birth of genetics - a field that continues to challenge the way we think about life itself.

[The Structure and Interpretation of Imperatives](#) Chung-hye Han 2000 The legendary Greek figure Orpheus was said to have possessed magical powers capable of moving all living and inanimate things through the sound of his lyre and voice. Over time, the Orphic theme has come to indicate the power of music to unsettle, subvert, and ultimately bring down oppressive realities in order to liberate the soul and expand human life without limits. The liberating effect of music has been a particularly important theme in twentieth-century African American literature. The nine original essays in *Black Orpheus* examines the Orphic theme in the fiction of such African American writers as Jean Toomer, Langston Hughes, Claude McKay, James Baldwin, Nathaniel Mackey, Sherley Anne Williams, Ann Petry, Ntozake Shange, Alice Walker, Gayl Jones, and Toni Morrison. The authors discussed in this volume depict music as a mystical, shamanistic, and spiritual power that can miraculously transform the realities of the soul and of the world. Here, the musician uses his or her music as a weapon to shield and protect his or her spirituality. Written by scholars of English, music, women's studies, American studies, cultural theory, and black and Africana studies, the essays in this interdisciplinary collection ultimately explore the thematic, linguistic structural presence of music in twentieth-century African American fiction.
