It's available monthly to AMA members. Become a part of the largest, most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800-AMA-JOIN.

Kingdom of Twilight Steven Uhly 2018-08-07 A "powerful and original" (The Times) historical saga that follows the quest for identity, redemption and home in the wake of World War II. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles--one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. *Kingdom of Twilight* follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it. Hypnotically lyrical and intensely moving, Steven Uhly's epic novel is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption.

Cyanotype Toning Annette Golaz 2021-09-30 Cyanotype is the most accessible and frequently used of all the alternative photographic processes. When utilized properly, it has the potential to rival other processes when it comes to detail and tonal range, but its Prussian blue color isn't always suitable for the final photograph. Throughout history, cyanotype prints have been toned not only with various—and at times hazardous—chemicals but also with more natural ingredients like tea and coffee. Since the cyanotype itself is non-toxic, Cyanotype Toning will champion an innovative process, developed by the author, of toning cyanotypes with natural material. This process, which is easy and reliable, offers a much broader range of possible colors and even beautiful black and whites. Even duotone or tricolor prints can be attained. The book consists of two parts. Part One is a step-by-step how-to section including all the information that a student at any level needs to achieve a successfully toned print. Easy-to-understand background information is provided on how and why the process works so that readers can venture on their own into the world of natural colors. The first part also has a detailed section on all the factors that can influence the outcome, like paper choice, water quality, properties of the plants, temperature of the bath and the duration of the toning. Part Two is devoted to contemporary artists who have explored toning with botanicals and integrated the process into their creative practice. The book includes: A list of equipment and supplies needed. In depth information about useful plants and the specific properties that make them suitable for toning cyanotypes. Concise step-by-step instructions for printing cyanotypes successfully. A chart of more than 60 tested papers with recommendations on paper choice. Step-by-step generic instructions on toning with botanicals. Troubleshooting toning with botanicals. More detailed recipes for specific colors with information about the plants. Step-by-step instructions on how to print duotone and tricolor prints. A range of creative ideas on how to use the process in classrooms and with different age

groups. A comprehensive list of more than 380 tested parts of plants and possible color outcomes. Using botanicals to tone cyanotypes broadens the color spectrum, enlarges creative possibilities and makes the cyanotype process even more versatile. The process is not cut and dried science but a limitless field for discovery and surprises. Cyanotype Toning provides accessible information and instructions for readers at all levels. It is comprehensive and explanatory, so that readers can expand on the subject on their own, as did the contemporary artists who share their experiences and the works they have created using this innovative toning process.

The Mini-Cycle Allan Weiss 2021-05-07 While scholars have been studying the short story cycle for some time now, this book discusses a form that has never before been identified and named, let alone analyzed: the mini-cycle. A mini-cycle is a short story cycle made up, in most cases, of only two or three stories. This study looks at mini-cycles spanning the period from Anton Chekhov's "little trilogy" (1898) to the "Alphinland" stories in Margaret Atwood's *Stone Mattress* (2014), including texts by such authors as Stephen Leacock, Alice Munro, Robert Olen Butler, and Clark Blaise. Consideration is also given to marginal examples, like Sherwood Anderson's "Godliness—A Tale in Four Parts" (1919), which can be seen as one story or four distinct texts unified under one title, and to what is called the "exploded" mini-cycle: one whose component stories are published with intervening stories between them rather than consecutively. For each mini-cycle, the analysis is based on close reading of both the linking elements—character, imagery, symbolism, and so forth—and the rhetorical and aesthetic effects of the mini-cycle's being made up of distinct stories rather than constructed as one long narrative.
